

## **Introducing Husqvarna K 1270 – high power and low emissions.**

*The new Husqvarna K 1270 comes with the patented X-Torq® engine that contributes to lower emissions and low fuel consumption. This without losing its superior power among petrol driven power cutters. In short; an unbeatable combination. At the same time, Husqvarna introduces Husqvarna K 1270 Rail, with the same benefits. Husqvarna K 1270 and K 1270 Rail will eventually replace all Husqvarna K 1260 power cutters.*

The Husqvarna patented X-Torq® engine provides a lot of power but is still able to keep both fuel consumption and emissions low. With the X-Torq® engine on K 1270, all Husqvarna petrol driven power cutters now have the patented engine solution, that uses air to flush out the cylinder instead of using fuel mixture as in a conventional two-stroke engine.

Besides the X-Torq® engine, that contributes to lower emissions while keeping the exceptional power, K 1270 also comes with a new magnesium blade guard (on 14" and 16"). The magnesium contributes to a light weight, which gives an improved power-to-weight ratio. In addition, the new stepless adjustment on the blade guard on all new K 1270 power

cutters makes it easier to change cutting position, which in turn facilitates cutting. K 1270 also has a new filter cover design.

"These features put together contribute to improved ergonomics – and a great advantage for the user", says Johan Simonsson.

In addition, this new powerful power cutter has digital ignition, something that already exists on Husqvarna K 970 and Husqvarna K 760. Digital enables improved startability, acceleration and response.

#### UNBEATABLE COMBINATION

New Husqvarna K 1270 with X-Torq® engine combines superior power with lower emissions and lower fuel consumption.

#### MAIN BENEFITS – HUSQVARNA K1270

- **Superior power but low emissions:** Thanks to the X-Torq® engine. Meets all national emission legislations worldwide.
- **Improved ergonomics:** Stepless adjustment of the magnesium blade guard (on 14" and 16") makes it easy to change cutting position. New ergonomic design on filter also contributes to improved ergonomics.
- **Increased power-to-weight ratio:** Thanks to the new light magnesium blade guard.
- **Digital ignition:** DM 51, as on Husqvarna K760 and Husqvarna K970.

TECHNICAL SPECIFICATIONS	K 1270	K 1270 RAIL
Displacement, cc	119	119
Power output, kW	5.8	5.8
Power / weight ratio	0.43/0.42	0.39/0.37
Blade diameter, mm	350/400	350/400
Max cutting depth, mm	118/145	118/145
Weight, without fuel and cutting equipment, kg	13.3/13.7	—
Weight without cutting and rail attachment equipment, kg	—	15.0/15.7

#### MAIN BENEFITS – HUSQVARNA K1270 RAIL

- **All the benefits** from Husqvarna K1270.  
In addition: **New rail power head.**

**EXCEPTIONAL POWER** New Husqvarna K 1270 Rail has all of new K 1270 benefits, plus a new rail power head.
